Plymouth Meeting, PA - Shearon Environmental Design is now a proud member of the Sustainable Business Network of Greater Philadelphia (SBN). Shearon Environmental Design offers professional landscape design/build services to address a comprehensive range of landscape design and site management needs. Recently, Shearon designed, installed, and completed a roof top garden at 2400 South Street in Philadelphia as well as the surrounding landscape. The "green roof" was designed & constructed using 200 cubic yards of engineered roof soil, a Finn machine to blow the mulch to the top of the building, 110 tons of 2" river stone and 800lbs. of sedum cuttings. When properly engineered and designed, green roofs result in a stable, living ecosystem that replicate many of the processes found in nature.

The Sustainable Business Network (SBN) is a non-profit membership organization working to build a thriving, local, and sustainable economy in the Greater Philadelphia region. Through their services, products, and internal practices, SBN's 400 members strive to create positive change for the environment and in their communities.
