### RE: Shearon Environmental Design Purchases Compressed Natural Gas Vehicles

Plymouth Meeting, PA, January 15, 2015 - Shearon Environmental Design is proud to announce that we have taken our "green" initiative one step further and will acquire (10) Ford F-450 trucks by April 2015 that are fueled by Compressed Natural Gas (CNG). Shearon Environmental Design was awarded funds under GPCC Grant Identifier 1008750 to help achieve the goals of The Southeastern PA CNG Vehicle Conversion Initiative, in compliance with the Department of Environmental Protection.

According to Ford, "Compressed Natural Gas (CNG) is a fossil fuel substitute for gasoline or diesel. It is generally safer than other fuels in the event of a spill (natural gas is lighter than air, and disperses quickly when released). CNG is produced by compressing natural gas, which is mainly composed of methane. CNG is used in traditional gasoline internal combustion engines that have been modified to operate on CNG."

CNG is an extremely clean-burning fuel and significantly reduces CO, CO<sub>2</sub>, and NO<sub>x</sub> compared to its gasoline counterpart.

#### About Shearon

Since 1974, Shearon Environmental Design Company has proudly supplied top-quality landscape design, construction and maintenance services to a broad range of customers throughout the greater Delaware Valley. Our corporate headquarters are located in Plymouth Meeting, PA with regional divisions maintained in West Chester, PA, Voorhees, NJ, and Princeton, NJ.
